PERSONAL TELCO PROJECT

The Personal Telco Project (PTP) is a Federal tax-exempt 501(c)(3) all volunteer group of Portlanders who believe that 802.11 (wireless networking, or "Wi-Fi") technology is both cool and empowering.

The PTP's mission is to promote and build public wireless networks through community support and education.

If you are interested in hosting a node, or know of another person or business which might be willing to donate a little bandwidth and a window ledge for the good of the community, then please, let us know, and let them know about us!

To find more info and a list of the many free wireless hotspots around Portland please visit us at

<http://www.personaltelco.net>
